Nasimul Arafin Rounok

Dhaka, Bangladesh | arefinrounok@gmail.com | 01707019447 | GitHub | LinkedIn

Summary:

Aspiring Software Engineer with a strong passion for building modern, responsive, and efficient web applications. Skilled in frontend development using React, with a solid understanding of HTML, CSS, and JavaScript. Experienced in working with Oracle databases using PL/SQL, Postgres, Prisma and Node.js for backend, and proficient in developing RESTful APIs with ASP.NET Web API and ASP.NET Framework. Enthusiastic about solving real-world problems through clean, maintainable code and eager to contribute to collaborative development teams. Currently seeking opportunities to apply and grow my skills in a professional software development environment.

Education:

American International University-Bangladesh (AIUB)

B.Sc. in CSE
Graduation: 2021-2025

- Major: Software Engineering
- Minor: Advanced Database Management System, Machine Learning

Skills:

- **Programming Language:** C++, Java, C#, JavaScript, PHP, Python.
- **Frontend Development:** HTML, CSS, JavaScript, Bootstrap, Tailwind, daisyUI, Material UI, ShadCn, React.js, Next.js, TypeScript.
- **Backend Development:** Node.js, Asp.net, TypeScript.
- **Database Management:** PostgreSQL, Prisma, Oracle, PL/SQL, MySQL.
- **Tools:** Git and GitHub, Figma.
- **Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)
- **Other Skills**: Software Quality Testing, MS Office, Easily Adaptable, Teamwork.

Projects:

Recipe Finder App

GitHub Link

HTML, CSS, Bootstrap, and vanilla JavaScript

A dynamic and responsive recipe search application developed using HTML, CSS, Bootstrap, and vanilla JavaScript. It fetches data from a public API using fetch () and displays results with interactive DOM updates. Features include real-time search with highlighted keywords, responsive layout, and modal popups for recipe details.

Simple React E-commerce App

GitHub Link

Built a single-page responsive e-commerce frontend using React, Context API, and Tailwind CSS. Implemented product search, sorting, cart management, and modal-based detail views. Deployed on Netlify with client-side routing.

Online Quiz System

GitHub Link

ASP.NET MVC Framework, SQL Server

- Developed a role-based web app for managing online quizzes using MVC architecture.

- Implemented CRUD operations, Entity Framework (EF), DTOs, and form validations.
- Added user/admin authentication for secure access and data integrity.

Shopping List App GitHub Link
ASP.NET Web API, C#, HTML, CSS

- Built a categorized shopping list app with item add/view/delete features.
- Enabled item status updates (bought/unbought), sorting, and price estimates.
- Included list sharing and category-based filtering (e.g., groceries, electronics).

Product and Customer Management System GitHub Link
ASP.NET MVC, C#, SQL Server, Entity Framework

- Built a system to manage products and customers with strong data validation.
- Enabled CRUD with DTOs and EF; enforced validation (price > 0, valid email, future date restrictions).
- Ensured structured database communication and reliable input handling.

LandVitality GitHub Link
PHP, HTML, CSS, JavaScript, MySQL (MVC-style structure)

- Created a platform connecting farmers, consultants, and admins for agricultural support.
- Consultants respond to queries, admins manage pages, and users post problems.
- Implemented multi-role user interaction and simplified UI.

Birth Record Management System GitHub Link
Oracle 10g, PL/SQL, Core PHP, HTML,CSS,JS

- Designing a database system to store and retrieve birth records efficiently.
- Focus on query optimization and secure CRUD operations following MVC structure.

Salary Prediction Using Data Analysis - (Python) GitHub Link
Python, Pandas, Scikit-learn, Matplotlib, Seaborn

- Performed data cleaning, feature engineering, and EDA to build and evaluate a Naive Bayes model for salary prediction using train-test split and 10-fold cross-validation.

Certifications:

- IT Essentials – Cisco Networking Academy

Web Development Intern:

- Trodad International LTD.

Interests:

- Software Development, Web Application Design, Database Optimization, Machine Learning.

Languages:

- Bangla, English
